# General Risk Assessment for Hilton Parish Council

'Risk is the threat that an event or action will adversely affect an organisation's ability to achieve its objectives and to successfully execute its strategies. Risk management is the process by which risks are identified, evaluated and controlled. It is a key element of the framework of governance together with community focus, structures and processes, standards of conduct and service delivery arrangements.' Audit Commission, Worth the Risk: Improving Risk Management in Local Government, (2001: 5)

Risk management is an essential feature of good governance. An organisation that manages risk well is more likely to achieve its objectives. It is vital to recognise that risk management is not simply about health and safety but applies to all aspects of Hilton Parish Council's work.

This document has been created to enable Hilton Parish Council to assess the risks that it faces and satisfy itself that it has taken adequate measures to control them. Hilton Parish Council is aware that although some risks can never be eliminated fully, it has in place a strategy that provides a structured, systematic, and focussed approach to managing risk, which:

- Identifies the key risks facing the council
- Identifies what the risk may be
- Identifies the level of risk
- Evaluates the management and control of the risk and records findings
- Reviews, assesses, and revises procedures if required.
